## New in our product range: The flexible daylight fixture DW 400

**kobold** the world's leading manufacturer of weatherproof daylight systems expands its multipurpose and weatherproof (IP 54) daylight product range with the new ultra-compact lamphead DW 400. This is based on the successful concept of the DW 575/800. **The fixture provides all the capabilities of an Open Face, PAR or soft light – depending on requirements and selected reflector, Fresnel lens, softbox or lantern.** Conversion is simple: no tools are required.

### **kobold** daylight at its best

This innovative fixture, with its compact and solid design, is the best choice for all lighting applications with the added benefit of maximum reliability even under extreme environmental conditions.

The design and the size of the new DW 400, make it even one of the smallest daylight fixtures available on the market today.

The housing concept of the new DW 400 ensures safe and reliable application outdoors and in rain (IP 54).

Due to the ingenious attachment concept, the DW 400 fixture can be adapted to the requirements of the user in no time at all. This multifunctionality makes the DW 400 unique in its class.

Available as accessories are: 4-leaf barn door with integrated holder for gel filters, conversion and diffusion filters, diverse Par lenses, Fresnel lenses, colour filter frames, softbox adapter for speed ring  $\varnothing$  168 mm / 6 5/8", scrims etc.

A high light output and an uniform illumination are achieved due to the optimised design of the reflector. The ergonomically positioned focusing knob enables focusing of 15° - 45° with the Open Face reflector.

This fixture can be optionally operated with the weatherproof (IP43) electronic ballast units EWB 400-575, EWB 400-575-800 with automatic voltage switching from 90 V to 265 V 50/60 Hz .

**kobold DW 400** fixture and ballast units are available individually, and in complete sets for mains operation.
