## Highest Safety Standards when Shooting with kobold

You certainly know how to protect your staff from small and more serious accidents. You, as a professional, are in the position to compile equipment which complies with the entire safety requirements, and ensure that the shooting team can work trouble-free even under difficult practical conditions.

With **kobold** products **you are on the safe side**. For example, the weatherproof daylight fixtures DW 200, DW 400 as well as DW 575 and DW 800 comply with the highest safety standards. In these systems, **the lamphead is protected against splashing water in accordance with standard IP 54**, and guarantees the highest protection for the user on the job, even with heavy rain. The matching ballast unit provides high operational safety with **protection class IP 43**.

**You too can take advantage** of the high safety standards of **kobold** products.

For more information please contact the kobold dealer in your country or visit [www.bron-kobold.com](http://www.bron-kobold.com).
